

# How to Create a Link

This guide demonstrates how to create a link within a Wiki or Guide.

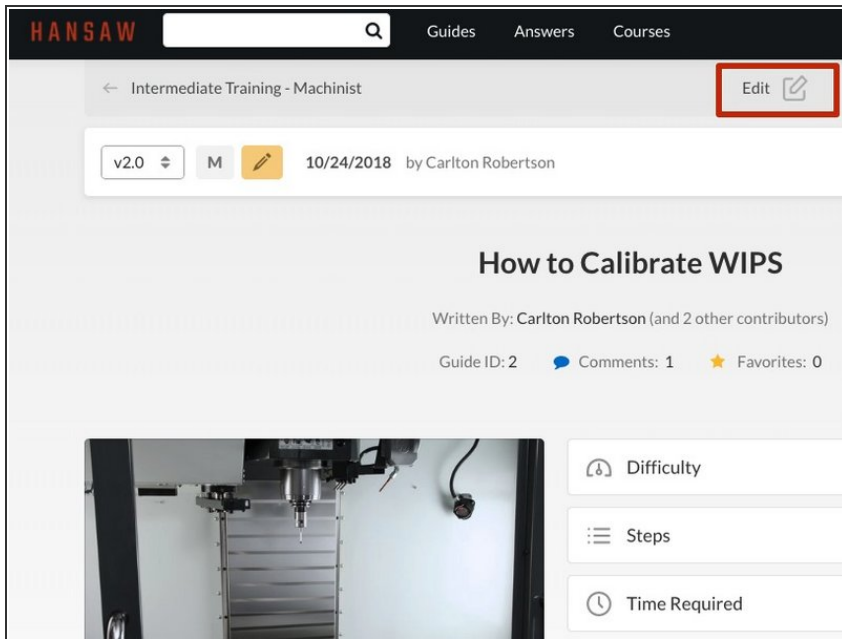

Written By: Dozuki System

## INTRODUCTION

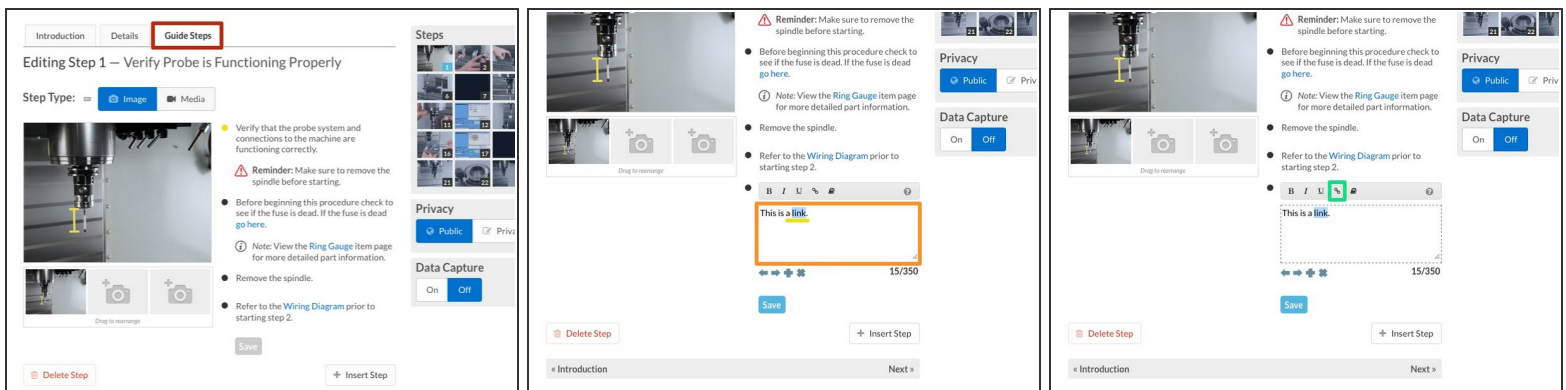

This guide demonstrates how to create a link within a Wiki or Guide.

## Step 1 — How to Create a Link

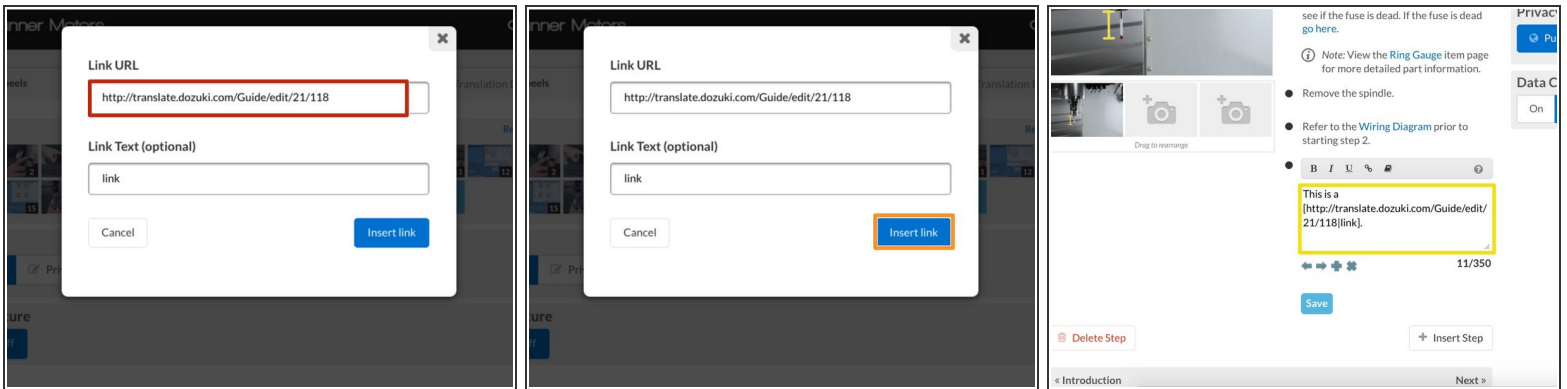

- Click on the **Edit** button on the upper-right of the page, beneath the site header.

## Step 2 — Edit Step

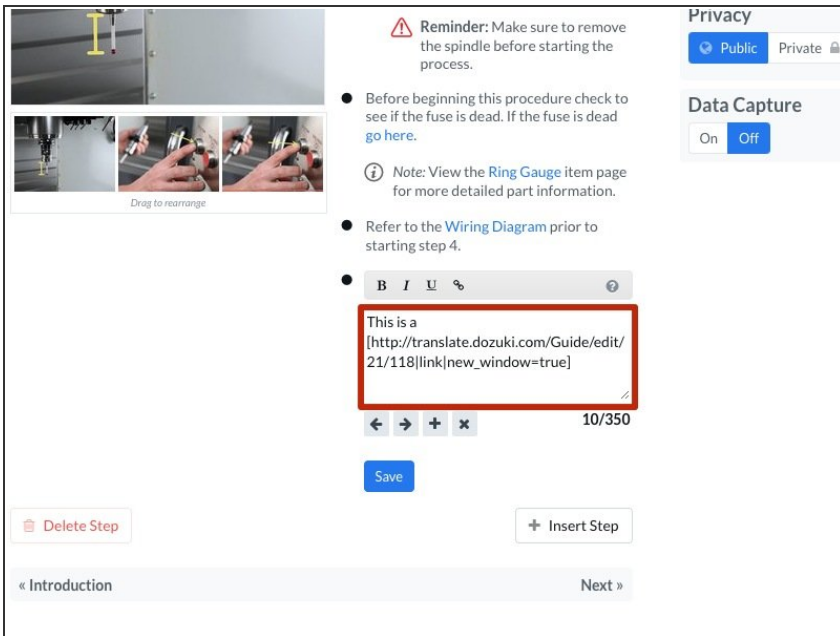

- Click on the **Guide Steps** tab.
- On the step for which you want to create a link, add a new bullet point and add your text.
- Highlight the text for the link.
- In the bullet formatting menu, click on the hyperlink button, which looks like two chain links.

## Step 3 — Insert Link URL

- Paste the link into the field labeled **Link URL**.
- Click **Insert Link**.
- You've successfully created a link!

## Step 4

**i** You can make a link open in a new window or browser tab by using the following syntax:

- [(your link URL)|new\_window=true]
