

# How to Machine Translate a Guide

This guide demonstrates how to machine translate a guide.

Written By: Dozuki System

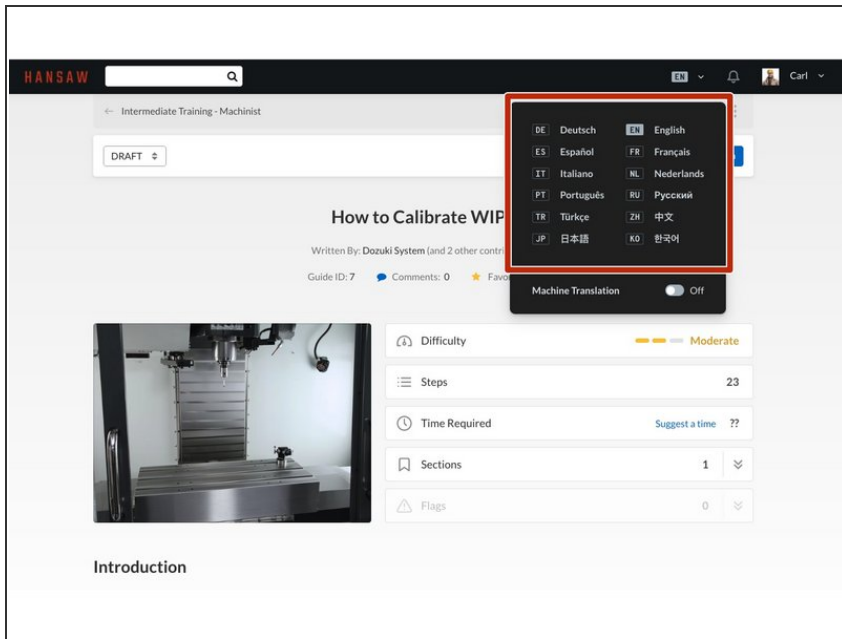

## INTRODUCTION

This guide demonstrates how to machine translate a guide.

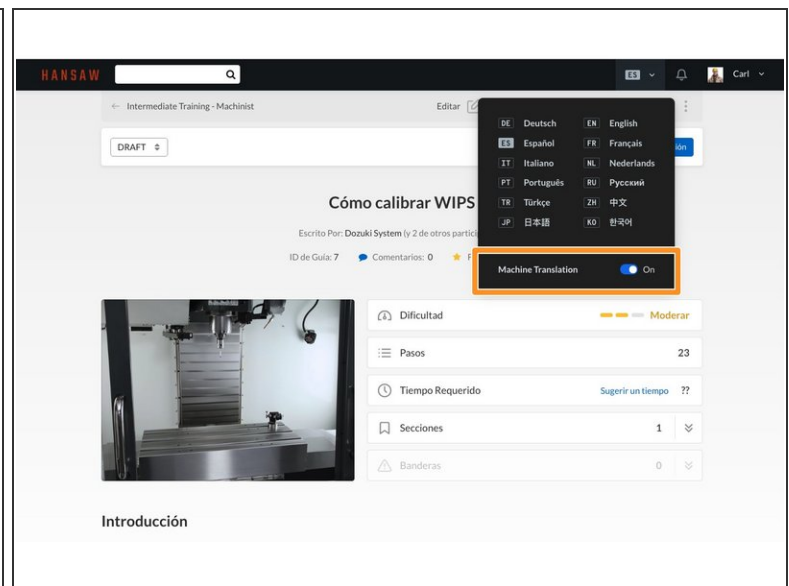

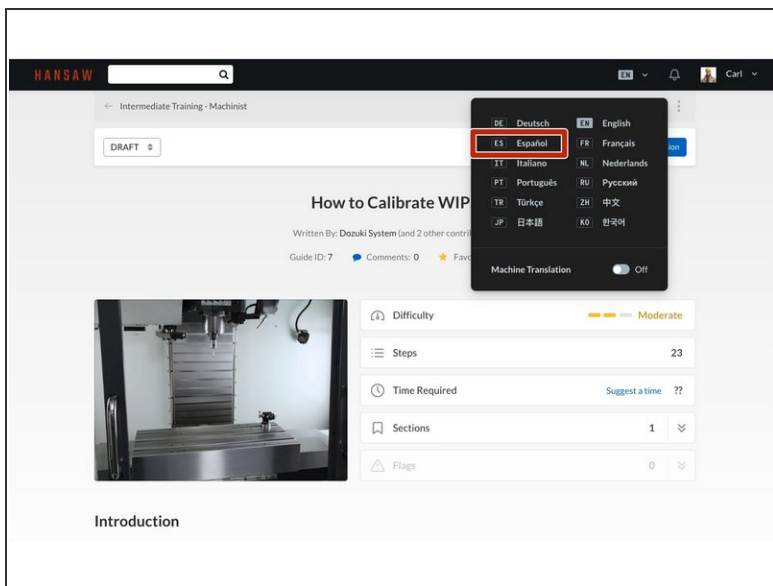

If you need to view a guide in a language different from what it was originally written in, or has been manually translated into, this guide teaches you how to machine translate the guide.

## Step 1 — How to Machine Translate a Guide

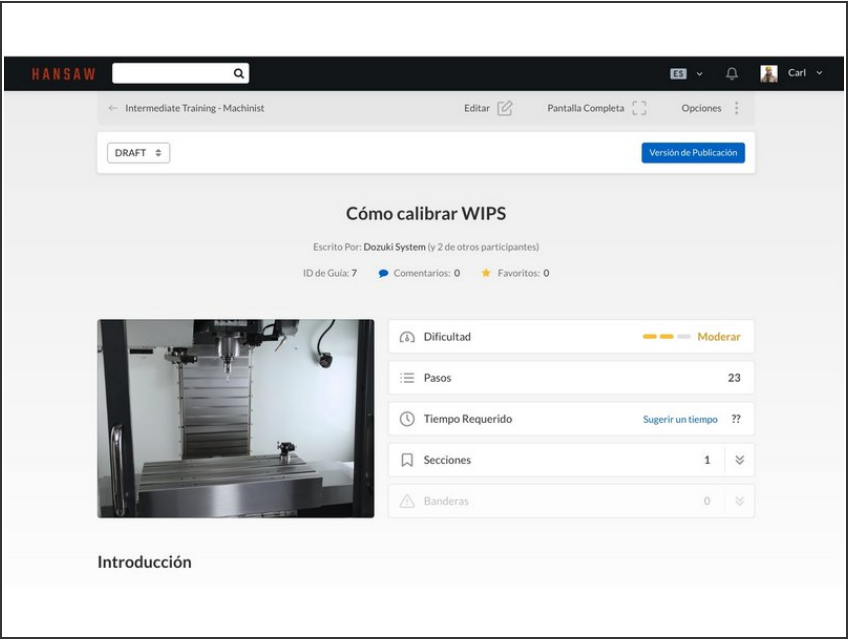

- While viewing the guide you want to translate, click and expand the **Language Menu** to reveal a list of languages to which your guide can be translated.

## Step 2

- Select your desired language.
  - For the purpose of this example, the site will be translated into Spanish.
- At bottom of the language list, toggle the Machine Translation **ON**.

Step 3

- The guide will refresh, and will be in the desired language.
- ⓘ The entire site interface will display in the selected language.
