How to Embed Media in Guide Steps

This guide demonstrates how to embed images and videos in Guide Steps using the Media Manager.

Written By: Dozuki System

INTRODUCTION

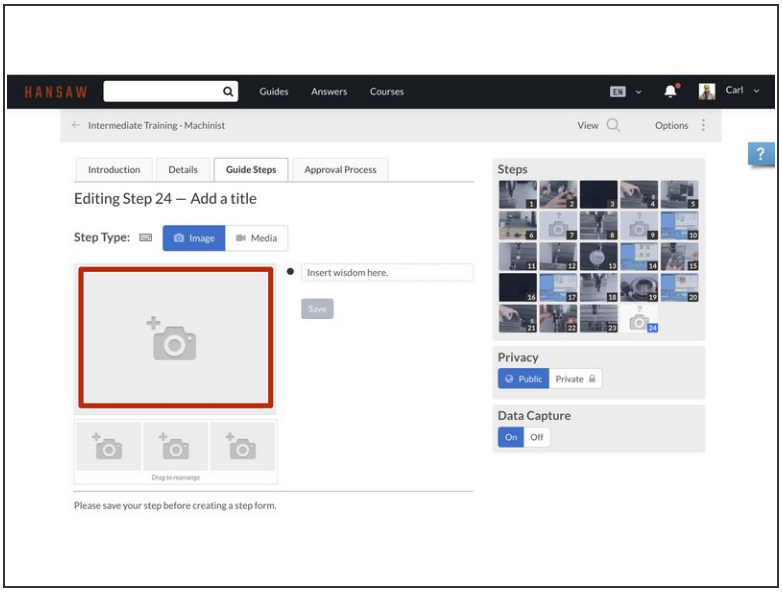

This guide demonstrates how to embed images and videos in Guide Steps using the Media Manager.

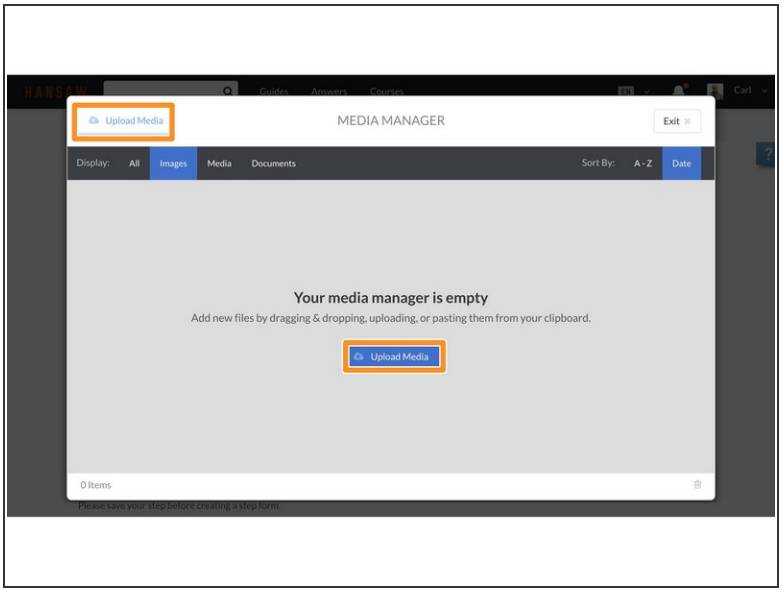

If you are looking to add dynamic media to a guide, go to Dozuki Integrations Page for more information.

Reminders

Any changes made to a guide, with the exception of tags and the default language, create a new draft of the guide.

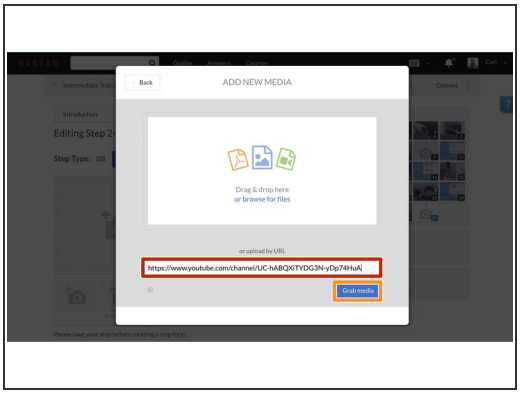

Step 1 — How to Embed Media in Guide Steps

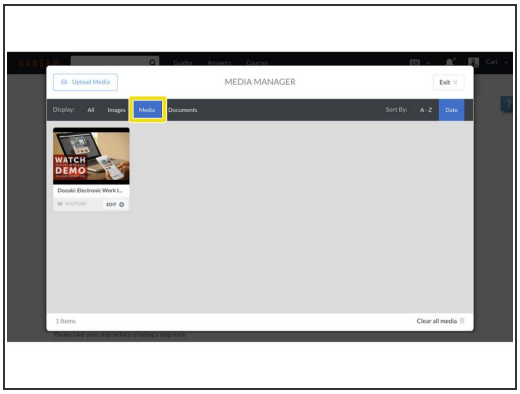

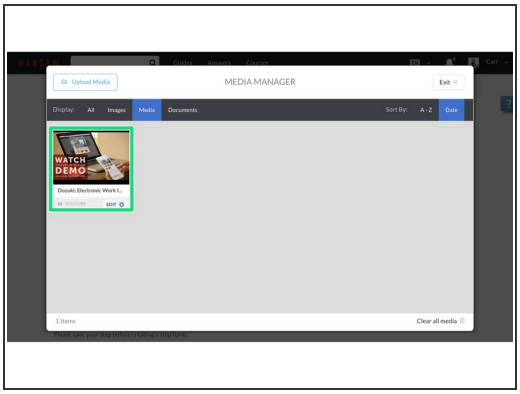

- To open the Media Manager from within a guide, click on the **Image/Video** placeholder.
- Click on the **Upload Media** button.

Step 2

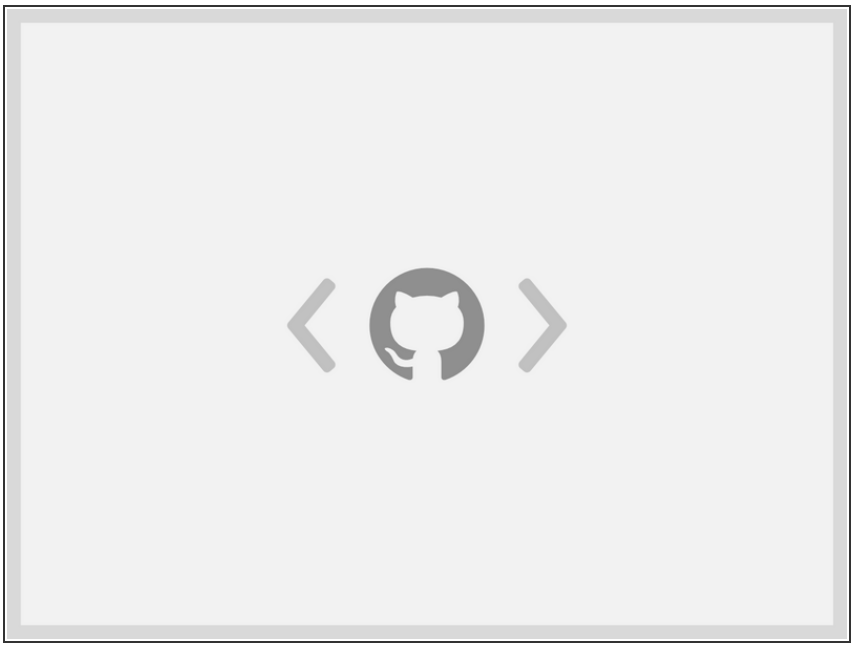

- Copy the URL from the media source.
- Paste URL in the **Upload URL** field below the Drag & Drop field.

  This example uses a YouTube video, but Guides also support Vimeo videos and those that support oEmbed.
- Click on the **Grab media** button.
- Click on the **Media** tab in the **Display** header.
- Click on your media to add it to your Guide Step.

Step 3

- Dozuki also supports many Standard Integrations.
- For example, this step contains a code snippet called a Gist.
- Here's a link to this Gist's source.

Step 4

- The embedded media will be added to the Guide Step.
- Add your text.
- Click **Save**.

That's it!
