

How to Use the QR Code Scanner

How to use the QR Code scanner feature built into the application to search for guides associated with QR codes on machines, products, or locations.

Written By: Dozuki System

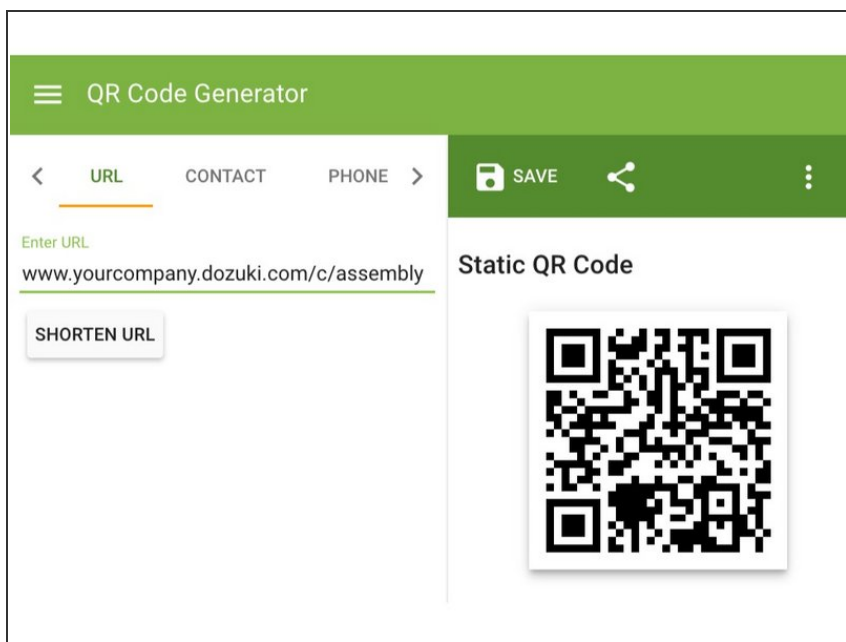

INTRODUCTION

This guide demonstrates how to use the QR Code scanner feature built into the application to search for guides associated with QR codes on machines, products, or locations.

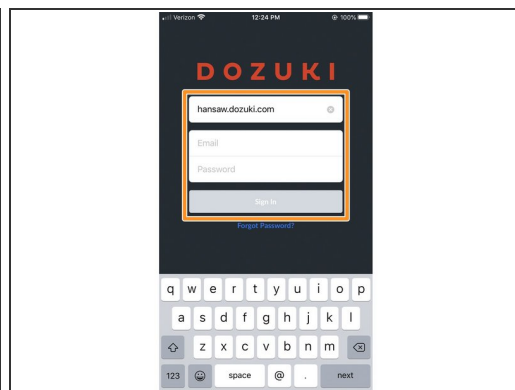

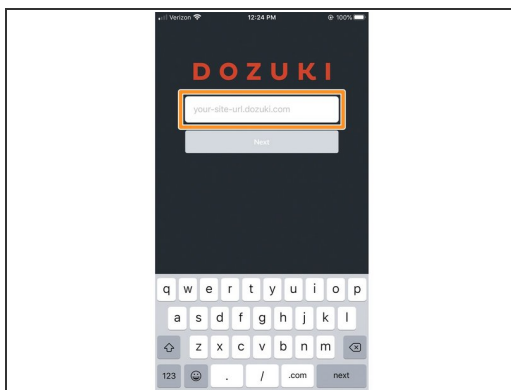

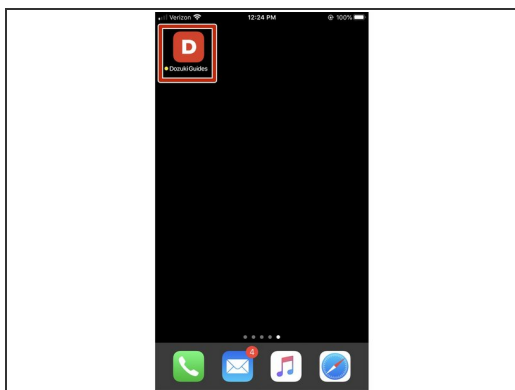

Looking to make it easier and faster for your users to access your guides? Now you can use the built-in QR Code Scanner in the Mobile app to find guides instantly!

Step 1 — Create QR Code Labels

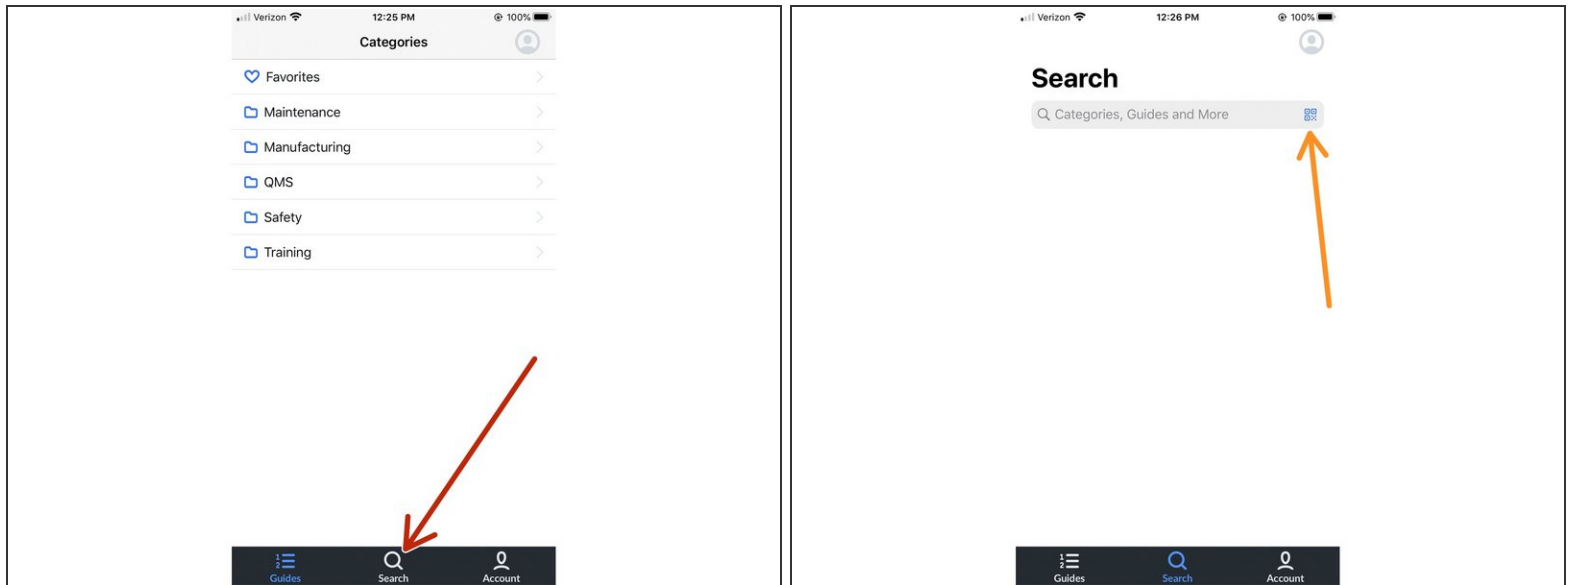

- Use one of the many free QR-Code Generators available online to create QR labels for your products, machines or locations.
- ☑ You can create different codes for different guide pages on your Dozuki site, then post them in the desired locations for users to scan.

Step 2 — Open the Android App

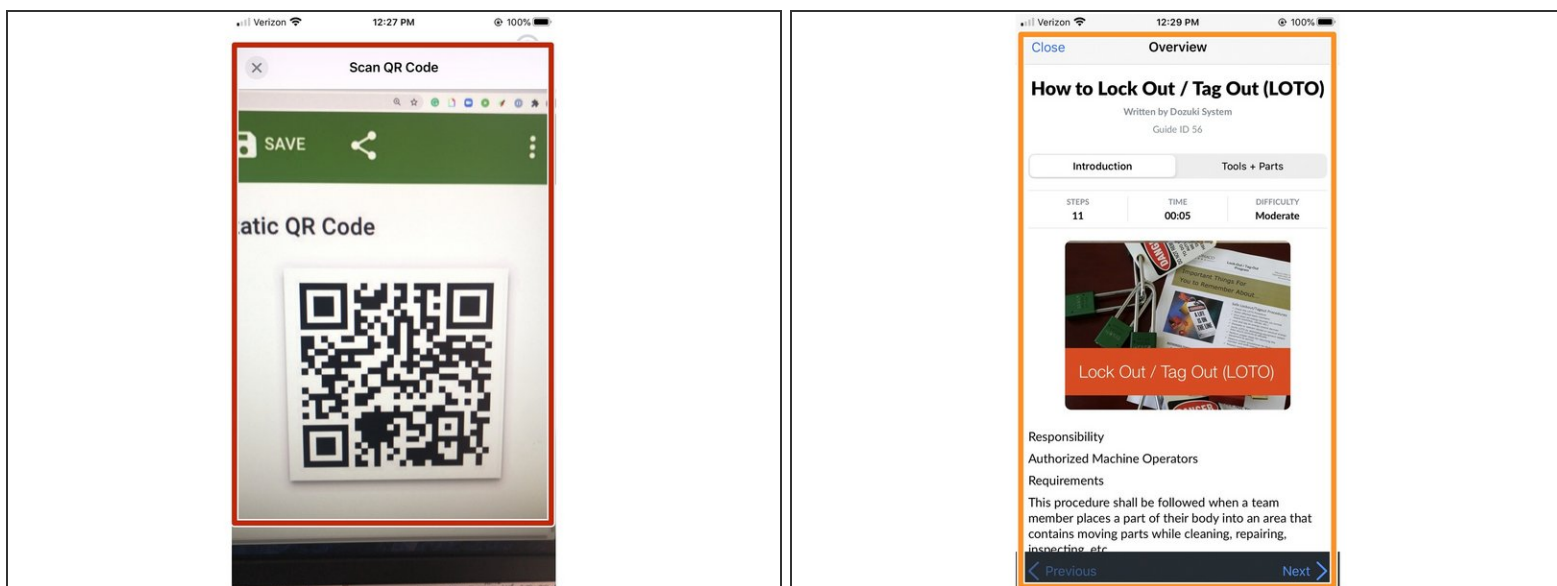

- Open the **App** on your mobile device
- Enter your **Site URL**, **email address**, and **Dozuki password** to log into the site.

Step 3 — Open QR Code Scanner

- Select **Search** from the navigation bar at the bottom of your screen.
- Click the **QR Scan** icon on the right of the search bar.
 - ① If you do not see this option, [contact us](#) so we can activate the QR Code Scanner in your app.
- The QR scanner will open through the camera on your mobile device.

Step 4

- Hold the device steady and place the screen directly over the QR Code.
- Once the code is scanned, the corresponding guide will open in the app on your device's screen.
