

How to Create a Wiki List

wiki list

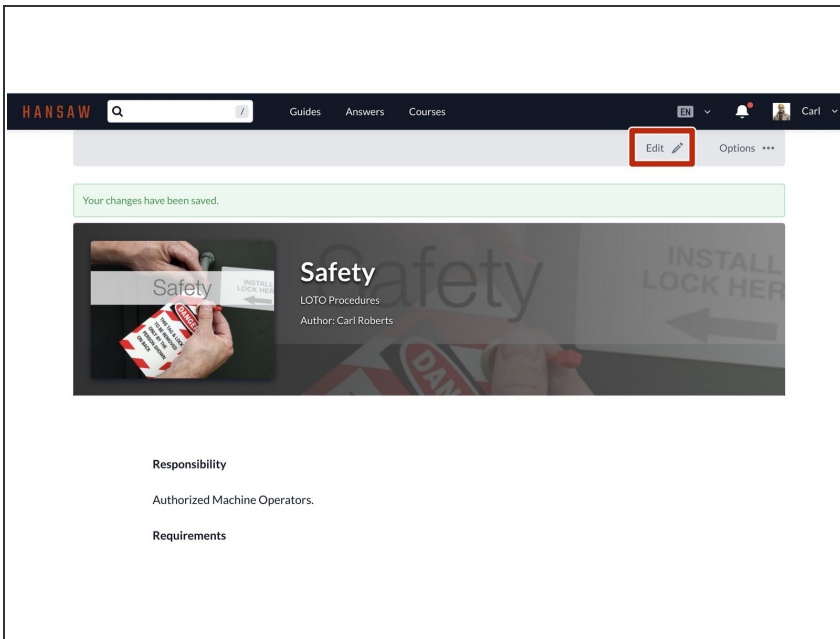

Written By: Dozuki System

INTRODUCTION

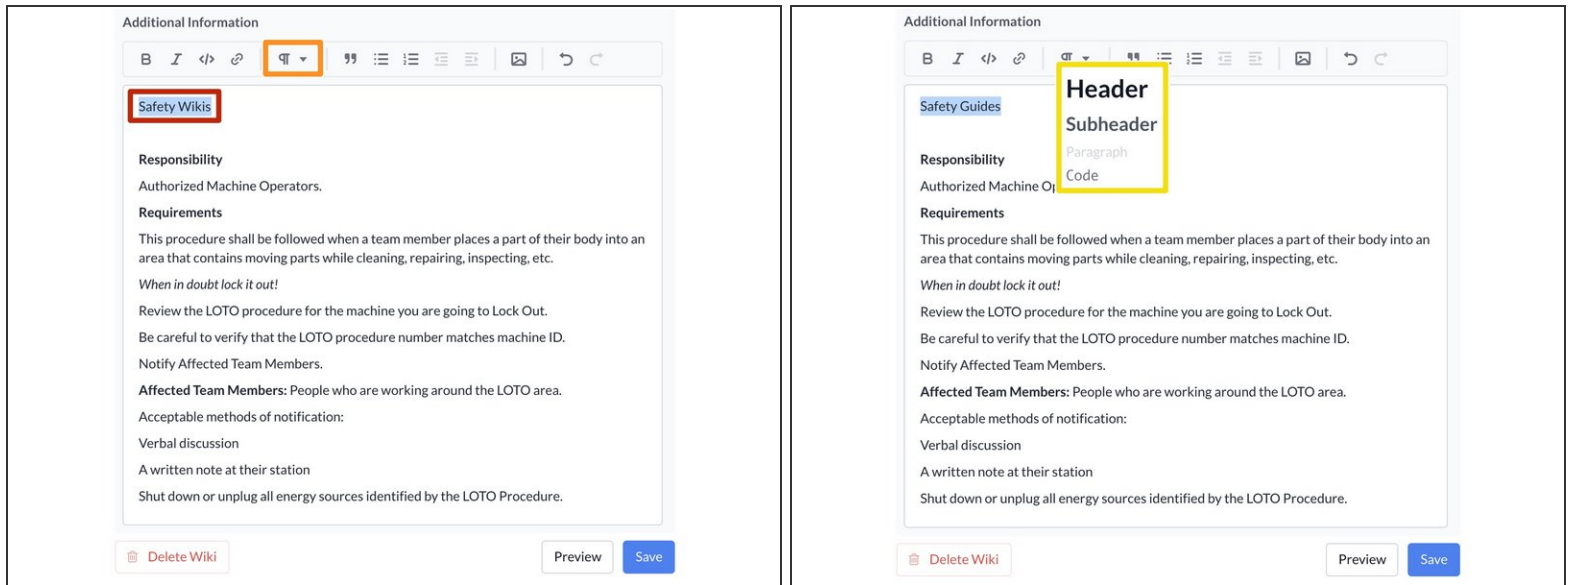

A dynamic wiki list is essentially an incomplete list. Because it's incomplete, you can keep adding wikis to it. A dynamic list searches the site; it searches for tags that are relevant to the list. This process groups all of the wikis together in list form.

Step 1 — How to Create a Wiki List

- Click on the **Edit** button in the top-right corner of the page where you want to create a dynamic list.

Step 2

i Under **Additional Information**, create a header to arrange your wiki list under a title.

- Highlight the text that will be used for your header.
- Click on the paragraph icon.
- Select header or subheader from the drop-down menu.

Step 3

- Using the example code, insert your information into the appropriate fields.
 - For example: `[wikilist|LOTO]` or `[wikilist|Safety]`
- [i](#) Add wikis to your list using tags.
 - The **Tags** section is on the bottom-right of the wiki edit page.
- [★](#) **The page that contains the wiki list must contain the tags of the wikis that are listed.**
 - After creating your list, click on the **Save** button.

Step 4

- Wikis that share the same tags are listed on the wiki's homepage.
- ① Wikis must be public to show up in their respective lists for all users.
- ① Private wikis only show in their respective lists for users who have access to that wiki.
