

How to Set up IP Whitelisting

How to Set up IP Whitelisting

Written By: Dozuki System

INTRODUCTION

As an added security feature, IP Whitelisting enables you to limit your site access to specific IP addresses. With IP Whitelisting included in your plan, you include the list of IP addresses that you want to whitelist. All other IPs will be blocked from accessing your site.

Step 1 — How to Set up IP Whitelisting

- Click on your name in the site header.
- Select Manage from the drop-down menu.

Step 2
