

Custom Bullets

Written By: Dozuki System

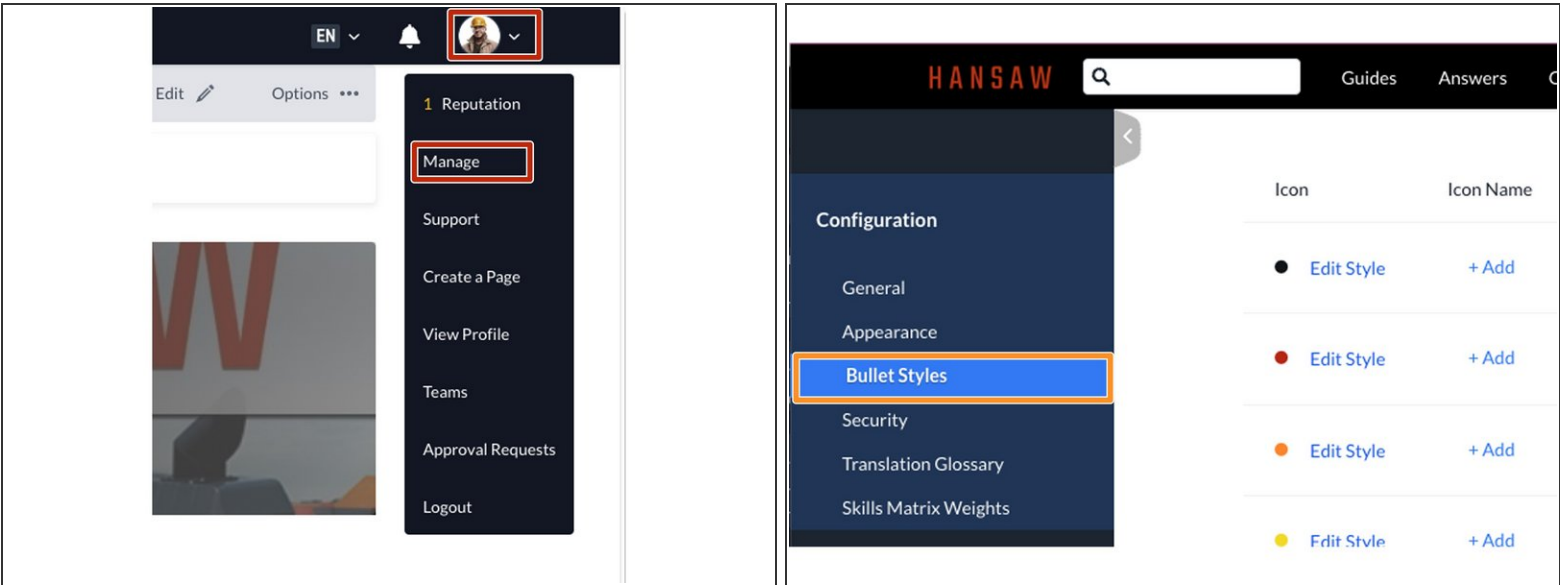

INTRODUCTION

The ability to customize bullet icon styles is now available, eliminating the reliance on custom CSS. Customizations, encompassing color, size, and various bullet types with additional functional elements are now possible.

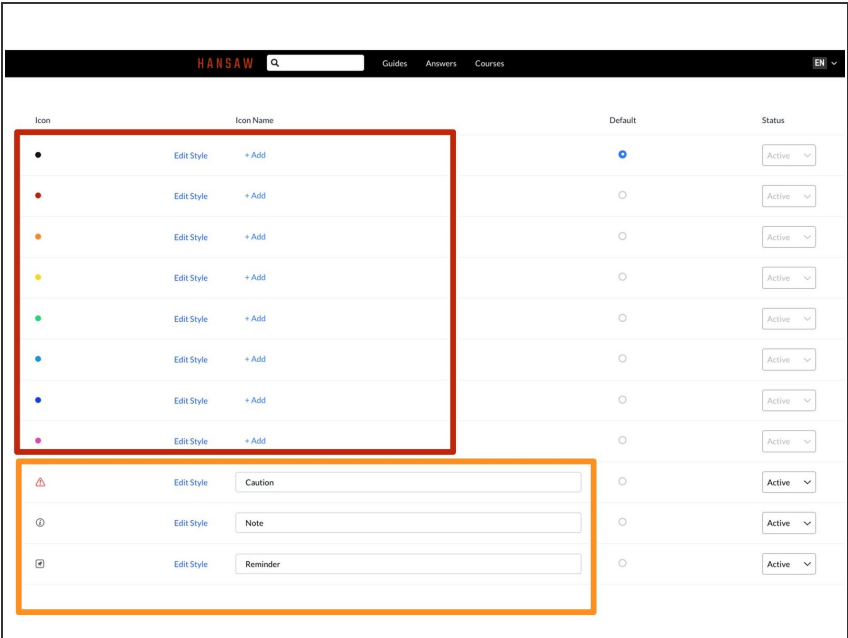

To facilitate this, a new management interface has been introduced, equipped with user-friendly tools to streamline the process of managing and refining their bullet icon styles.

Step 1 — Custom Bullets

- To access the user menu, click on the drop-down arrow next to your name in the right of the site header and select **Manage**.
- Under **Configuration**, find the **Bullet Styles** tab and click on it to access the editor.

Step 2

- The editor first presents two sets of bullet styles:
 - 8 standard dot bullet styles
 - 3 custom bullet styles: **Caution**, **Note**, **Reminder**

Step 3

Icon	Icon Name	Default	Status
● Edit Style + Add		●	Active
● Edit Style + Add		○	Active
● Edit Style + Add		○	Active
● Edit Style + Add		○	Active
● Edit Style + Add		○	Active
● Edit Style + Add		○	Active
● Edit Style + Add		○	Active
● Edit Style + Add		○	Active

- Note that the 8 dot bullet styles have limited customizations.
- Their status is automatically set to Active.
- Color customization is not available for them.
- However, the **Caution**, **Note**, and **Reminder** bullets are fully customizable.

Step 4 — Editing a Bullet Style

Edit Bullet Style

Size: Medium

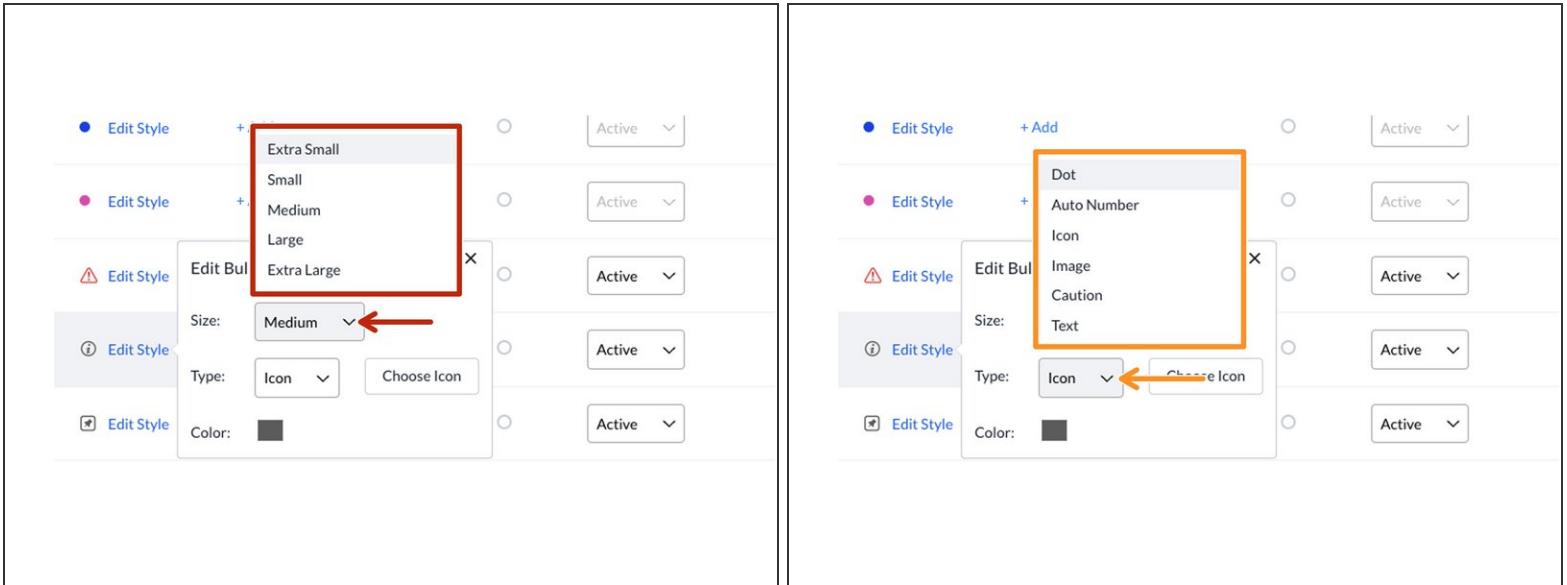

Type: Icon

Choose Icon

Color:

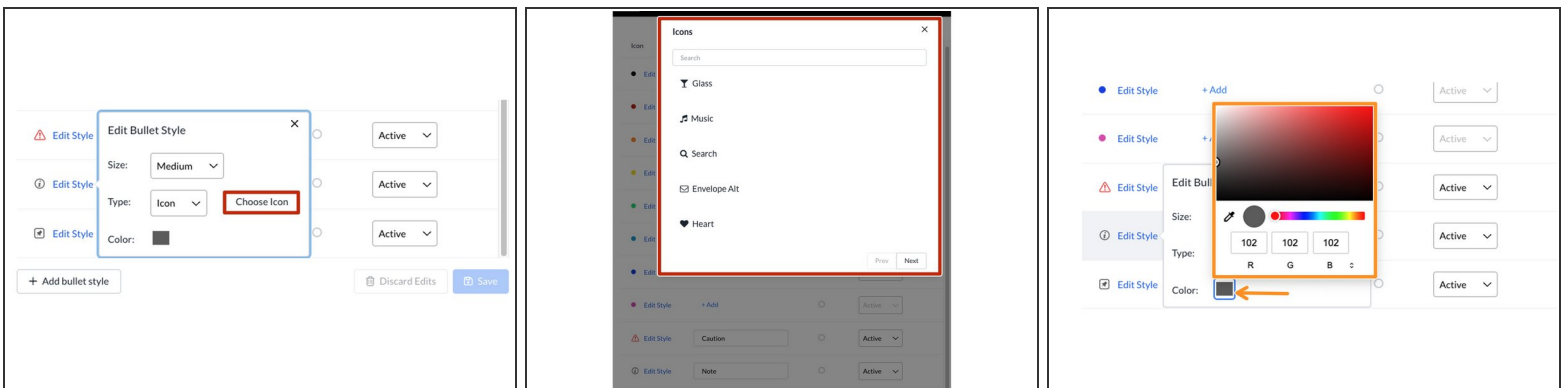

- Choose the bullet style you want to edit and click on **Edit style**.
- Modify parameters: Size, Type, Color, and Choose icon.

Step 5

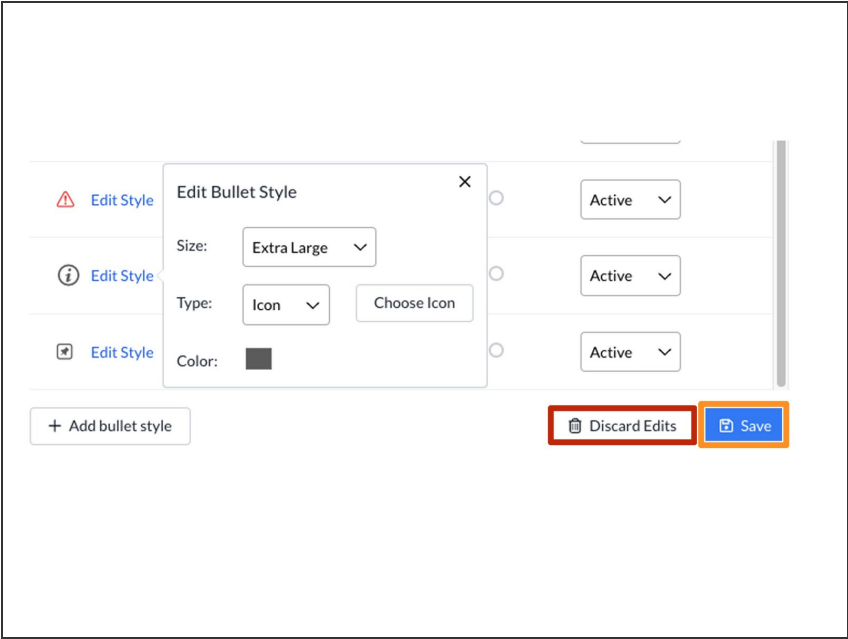

- From the **Size** drop menu choose one of the 5 different bullet sizes.
- From the the **Type** drop menu choose one of the 6 different bullet types.

Step 6

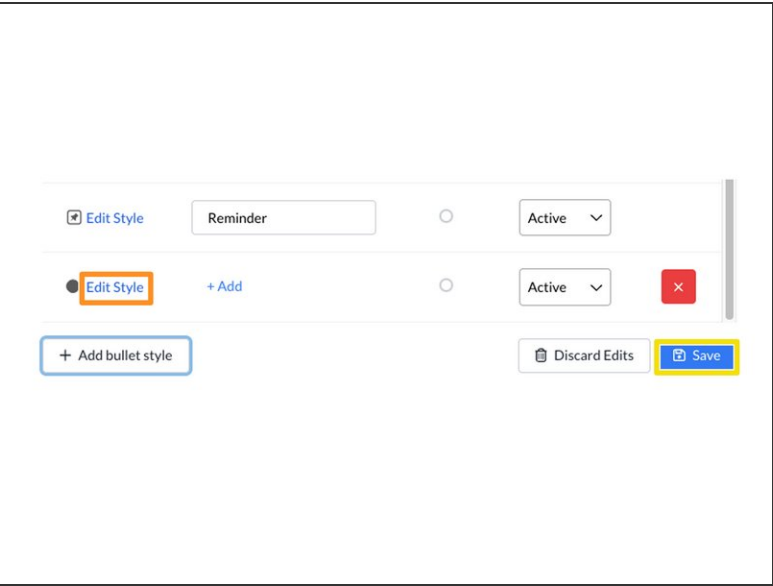

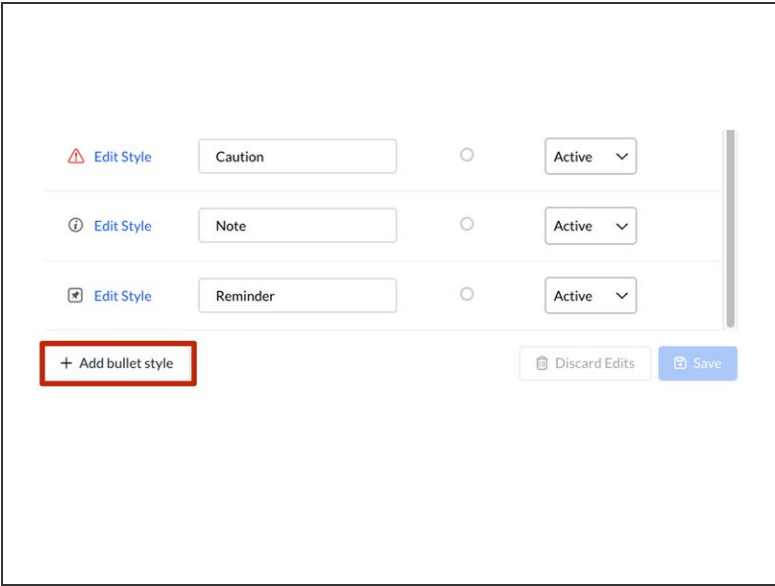

- Click on the **Choose Icon** option to search through an array of icons and apply them.
- Use the **Color** drop menu to select from a diverse range of colors for your bullets.

Step 7

- To undo the changes you make, click on **Discard Edits**.
- When you're satisfied with the edits, click **Save**.

Step 8 — Creating a New Bullet Style

- Click on **Add bullet style** to create a customized bullet.
- Click on **Edit style** to choose the desired color, size, icon, and type for your new bullet.
- Remember to click **Save** when you finish editing.

Step 9

The image shows two side-by-side screenshots of the 'Custom Bullets' interface. The left screenshot shows the 'Add' button highlighted with a red box. The right screenshot shows the 'New Bullet' text box highlighted with an orange box and the 'Save' button highlighted with a yellow box. Both screenshots show a list of bullet styles with columns for 'Edit Style', 'Name', 'Status', and 'Action'.

Edit Style	Name	Status	Action
<input checked="" type="checkbox"/> Edit Style	Reminder	<input type="radio"/> Active	
<input checked="" type="radio"/> Edit Style	+ Add	<input type="radio"/> Active	<input type="button" value="X"/>

+ Add bullet style Discard Edits Save

Edit Style	Name	Status	Action
<input checked="" type="checkbox"/> Edit Style	Reminder	<input type="radio"/> Active	
<input checked="" type="radio"/> Edit Style	New Bullet	<input type="radio"/> Active	<input type="button" value="X"/>

+ Add bullet style Discard Edits Save

- Optionally, add an icon name for easy identification.
- Click on **+ Add**.
- Type the chosen name.
- Click **Save**.

Step 10 — Setting a Default Bullet Style

Icon	Icon Name	Default	Status
● Edit Style	+ Add	<input checked="" type="radio"/>	Active
● Edit Style	+ Add	<input type="radio"/>	Active
● Edit Style	+ Add	<input type="radio"/>	Active
● Edit Style	+ Add	<input type="radio"/>	Active
● Edit Style	+ Add	<input type="radio"/>	Active
● Edit Style	+ Add	<input type="radio"/>	Active
● Edit Style	+ Add	<input type="radio"/>	Active
● Edit Style	+ Add	<input type="radio"/>	Active

- The black dot bullet is set as the default, but you can easily change it.
- Just choose the desired bullet and click on the radio button next to it.
- Click **Save**.

Step 11 — Deleting a Bullet Style

- To delete a bullet style, click on **Delete a Bullet Style**.
- Select the bullet style you want to delete.
- ⓘ Note that the top 8 bullet styles cannot be deleted.
- Select a bullet to replace the one you want to delete.
- Click **Delete bullet style (this cannot be undone)**.
